

Description

The WM-IV-Weighing Module is designed to utilize single ended shear beams-Model-30310 for platform weighing. The module is available in mild steel. Loading of the load cell is through a spherical ball mechanism assembly that reduces side load induced errors. It is self-checking and low profile module suitable for medium capacity applications.

Features

- Available for load up to 2.5Tf.
- Mild steel zinc plated construction.
- Bolts directly to the load cell for floor scale.
- Swivel mechanism for minimized corner errors.
- Rubberized base for shock absorption and stability.

Applications

- Platform Weighing.
- Low profile scales.
- Tank Weighing.

All dimensions are in mm. Specifications are subject to change without notice
